3rd Annual Workshop of the Recosy Project

EURATOM, EC FP7, Collaborative Project

21st - 24th March 2011

Balaruc-les-Bains

France

Laboratoire SUBATECH

Objectives

The Workshop is held within the context of CP RECOZY (www.recozy.eu). Main objectives of the project are the sound understanding of redox phenomena controlling the long-term release/retention of radionuclides in nuclear waste disposal. The Workshop is provided for discussion, documentation, dissemination (proceedings) and future planning on all topics related to the FP7 Collaborative Project RECOZY, both within the project and with a broader interested community.

Location

The 3rd Annual Workshop of the Collaborative Project RECOZY will be held in **Balaruc-les-Bains (Sète – Languedoc – Roussillon) France**, 21st to 24th March 2011, hosted by Subatech.

General Information

In this 3rd Annual Workshop a specific **Topical Session** will be held on **“Electrochemistry and Redox Processes”**.

The main focus of the Annual Workshop is on presentation and discussion of scientific and technical project results. Plenary sessions are used for communicating results from the different technical workpackages. An important element in fostering scientific-technical discussion and exchange are the poster sessions. The scientific-technical outcome will be published through workshop proceedings. Additionally, the project participants will have the opportunity to discuss administrative and project implementation issues.
