Final (4th Annual) Workshop of the Recosy Project

EURATOM, EC FP7, Collaborative Project

23rd - 26th January 2012
Karlsruhe, Germany

Karlsruhe Institute of Technology (KIT)
Institut für Nukleare Entsorgung (INE)

Objectives

The Workshop is held within the context of CP **RECOSY** (www.recosy.eu). Main objectives of the project are the sound understanding of redox phenomena controlling the long-term release and retention of radionuclides in nuclear waste disposal. The Workshop is providing for discussion, documentation, dissemination (proceedings) and planning on all topics related to the FP7 Collaborative Project **RECOSY**, both within the project and with a broader interested community.

Location

The Final Workshop (4th Annual Workshop) of the Collaborative Project **RECOSY** will be held at the **Akademie Hotel** in **Karlsruhe, Germany**, 23rd to 26th January 2012, hosted by **KIT-INE**.

General Information

In this Final Workshop a *specific Topical Session* will be held on “*Integration of redox processes in the Safety Case*”.

The main focus of the Annual Workshop is on presentation and discussion of scientific and technical project results. Plenary sessions are used for communicating results from the different technical workpackages. An important element in fostering scientific-technical discussion and exchange are the poster sessions. The scientific-technical outcome will be published through workshop proceedings. Additionally, the project participants will have the opportunity to discuss final administrative and project implementation issues.
